

Studiocode Data Sheet

Capture

- Capture observations live from a DV camera or after the event from DV tape, VHS or DVD
- Code the video while capturing video content
- Supports DV, DV widescreen, Analogue, MPEG4, SDI, HD
- Preset capture time
- On the fly compression

Coding Structures

- No predefined structures or templates – you set the rules
- Define your own code and label buttons
- Set lead and lag times for codes or leave them as toggles
- Define powerful coding relationships through the use of activation and exclusive code behaviors
- Define keyboard hot keys
- Supports multiple input devices for multiple coders
- No limit on how many Code Templates you can have, making it possible to use the same program across multiple disciplines
- Edit and re-edit your templates as often as required
- Code events live
- Integrate transcripts with codes

Search

- Quickly locate and review events, even across timelines and folders
- Up to 20 search combinations
- Easily find and analyse transcription text and information
- Perform multi levelled bouillon search routines
- Search for information based on codes, labels, text or transcription data
- Search for data from 1 observation or across entire database
- Find and review events from the Code Matrix
- Set up Boolean (and, or and not) search criteria within the Matrix

Import

- Data lists
- Transcripts from any tab delimited structure

Analysis

- Intelligent searching with up to 20 search combinations using and, or and not routines
- Studiocode's code matrix cleverly pulls together vital statistical information with the corresponding video
- Create a still image from any video frame
- Conduct multi leveled statistical inquiries
- Splice video files to play side by side
- Overlay any two video files
- Create video databases
- Review frequency lists for events
- Export statistical information for further investigation in other programs
- Review sequential frames within any video instance through the Instance Monitor
- Insert text notes into instances for ease of referral

Making Movies

- View Instances in multiple window sizes
- Replay video at different speeds, frame by frame, fast forward/backward
- View single instances or compile multiple instances and make a movie
- Present a movie on your computer or an external device
- Integrate your movie into other applications such as PowerPoint
- Quickly compile movie presentations with titles in the Movie Organizer
- Show text track captions in the movie output window.
- Simply edit instance lengths and codes

Transcription

- Create or import transcriptions
- Play transcripts as a caption track
- Easily find and analyse text strings
- Populate a timeline with transcription information
